BLOWER PACKAGE

Powerful - Efficient - Built to Last

Our equipment can save you on costs by providing amazing results. Instead of trying to fit a 'standard model' into your system, we custom-size our blower packages to meet your needs – and cost no more than cheaply built units.

We know that our clients are going to rely on our blower packages to keep their operations running for the long haul so we engineer and manufacture them to last.

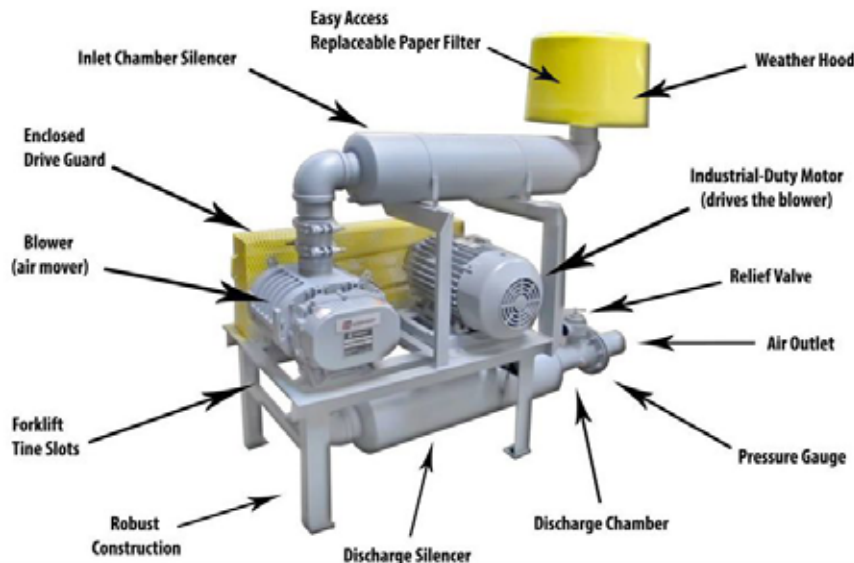

US Systems motor blower packages are designed, manufactured, and assembled in our shop from premium materials and components that will exceed operating conditions for continuous service. Our blowers won't let you down

Blower Assembly Features:

- Capacities from 100 CFM to 2600 CFM
- 15 PSI - 18" Hg operation
- High capacity intake filter
- Filterminder service indicator
- Rigid structural steel frame and mounting table
- Variable speed, direct or belt drive
- OSHA belt guards for safety
- Configured for portable or fixed applications
- Premium quality TEFC or XP Motor
- International voltages available
- Air to air heat exchangers/after-coolers available

Blower Assembly

(blower assemblies can be custom-designed for application - wide variety of options available)
