

We have talented industrial controls engineers on-staff ready to squeeze productivity out of any process.

Our systems feature industrial-duty control panels that automate much of the process, allowing your system to run smoothly, with less downtime.

We're passionate about constructing top-quality industrial control panels. We offer a wide-range of panels including:

- Motor Control Center
- PLC Control Panels
- VFD Control Panels
- HMI Panels
- Operator Stations
- Pneumatic Control Panels

**We Design and Build Panels Based on Your Application:**

- NEMA-Rated Control Panels
- Disconnect Switch
- Primary Circuit Protection
- Industrial-Duty Buttons, Selector Switches, and Door Devices
- PLC - Programmable Logic Controller
- Motor Starters
- HMI - Human Machine Interface
- LED Indicator Lights and Alarm Lights
- Variable-Speed Motor Controls
- Touchscreen HMIs
- Remote Networking Capability
- Data Collection and Historization
- SCADA - Supervisory Control and Data Acquisition
- Interface with Industrial Robots and other Panels
